

Mooring

It is recommended that the weights indicated be submerged weights. Using the following table to calculate required weight of material submerged.

Table of Weight Loss in Water

	Dry	Submerged	% Weight Loss
Concrete	1,000 lb.	550 lb.	45%
Granite	1,000 lb.	640 lb.	36%
Iron	1,000 lb.	860 lb.	14%
Steel	1,000 lb.	870 lb.	13%
