MEMO TO: Stonington Water Company Customers

FROM: Annaleis Hafford P.E., Water Company Manager

SUBJECT: Change Over to Temporary Water – Water Transmission Line  
Improvements Project

As you are aware, the Water Company has received funding to replace its failing transmission line which supplies potable water to the entire Town. We are providing notice to you regarding the upcoming plans to transfer the Town's water supply to the temporary water transmission system that has recently been installed. This is necessary to make the improvements to the permanent water transmission line from the water pumping station on Pumping Station Road to the water storage tank located on Sunset Avenue. We are notifying all customers because this transfer may cause temporary fluctuations in water and water outages for short periods of time as we make this change over. It is necessary to put the system on temporary water prior to starting the replacement of the water transmission line.

This process will start in a few weeks and may cause disruptions to your water supply and pressure fluctuations during the transfer of service. Please call either Patrick Smith, Olver Associates Inc. onsite representative at 207-852-8626 or the office at Olver Associates Inc. at 207-223-2232 if you have any questions or concerns. We appreciate your patience with all of the water system improvements that we have been working hard to complete.
